Academic research

Bio

Edouard Duchesnay is a research scientist at NeuroSpin, CEA, Paris-Saclay University, France. Since 2003 he is designing machine learning models to discover brain imaging signatures of mental disorders. He explored dimension reduction and regularization strategies to overcome the "curse of dimensionality" caused by a large number of neuroimaging measurements. In 2019, he obtained a chair in Artificial Intelligence to develop transfer learning algorithms to bridge the gap between big (heterogeneous) and small (homogeneous) datasets. He received his Ph.D. in 2001 and M.S. degree in 1998 in signal and image processing from Rennes 1 University (France). In 1997, he received his M.S. degree in software engineering from École Pour l'Informatique et les Techniques Avancées (France).
